PROFESSIONAL SUMMERY

Computer Science graduate and enthusiastic Software Developer with hands-on experience in HTML, CSS, JavaScript, React, and modern web development. Familiar with building responsive applications, API integration, CRUD operations, and debugging. Strong problem-solving and learning mindset, with a keen interest in developing software solutions and growing through hands-on training.

TECHNICAL SKILLS

Languages and Technologies: HTML, CSS, Tailwind CSS, JavaScript, Node.js

Frameworks and Libraries: React, React Router, Chakra UI, Express.js

Databases and Platforms: Git/GitHub, VS Code, Firebase, Netlify, MongoDB, REST APIs

Soft Skills: Time Management, Effective Communication, Attention to Detail, Adaptability, Problem-Solving

EDUCATION

Masai School, Bengaluru
Software Development

Anuradha Engineering College, Chikhli Aug 2020 - June 2024
B.E. Computer Science and Engineering

PROJECTS

CRM — Sales & Customer Management Platform | *MongoDB, Express.js, React, Node.js, REST APIs, JWT, Git*

- Deployed the application on **Vercel**: https://client-relationship-management-crm-ten.vercel.app/
- Developed a full-stack CRM platform to manage leads, customers, sales deals, and follow-up activities.
- Implemented secure user authentication with JWT and role-based access control for Admin and Sales Executive.
- Built RESTful APIs with Express.js and MongoDB for CRUD operations, record assignment, search, filtering, and pagination.
- Designed a React-based interface for managing sales pipelines, tracking deal stages, and scheduling customer follow-ups.

Comet Shoes E-commerce | *React, Tailwind CSS, Node.js, Express.js, MongoDB*

- Deployed the application on **Vercel**: shoe-ecom-chi.vercel.app
- Developed a responsive full-stack footwear e-commerce application inspired by Comet Shoes.
- Built to manage products, product variants, search, and shopping cart operations.
- Implemented JWT-based authentication, password hashing with bcrypt, and protected cart endpoints.
- Implemented product search, dynamic product detail pages, size selection, and cart quantity management.

Wheather Forecast | *React, State Management, CSS, OpenWheatherMap API, JavaScript ES6+, Git*

- Deployed the application on **Netlify**: https://whetherforecastapp.netlify.app/
- Developed a 5-day weather forecast app using React to provide real-time weather data for user-selected cities.
- Implemented local storage to save and display recently searched cities, enhancing user experience.
- Integrated OpenWeatherMap API to fetch accurate weather data and displayed it with responsive forecast cards.
- Added loading states, error handling, and notifications to improve app reliability and provide clear feedback to users.

CERTIFICATIONS

Hackathon Participant
Masai School Contributed to a team project, learned rapid prototyping and collaborative coding techniques.

Full Stack Web Development
Masai School successfully completed the Full Stack Web Development course.
